## **FY25 Rural Roads Paving**

March 2025

### **ROADWAY PROJECT**

The project consists of the replacement of chipseal over millings roads with new asphalt at multiple locations. The roadway width should be maintained where possible; if the roadway is under 20 feet wide, Staff will determine if it is possible to widen the roadway. Some of the roads are one way in and one way out. Drainage on all roads will be analyzed on a road-by-road basis, as they are all a little different. Utility Adjustments for construction will be needed.

The design for this project will be done in-house and 30% plans and specifications are in design.
